Electrical	240v, 2 x 3w LEDS, Warm White 3000K 28° beam angle
Colour/ Finish	Textured Black powder coated aluminium
Exterior Dimensions	130mm diameter and 68mm deep

240v · Beam 28° · IP54 · Built-in LED · 261 lm
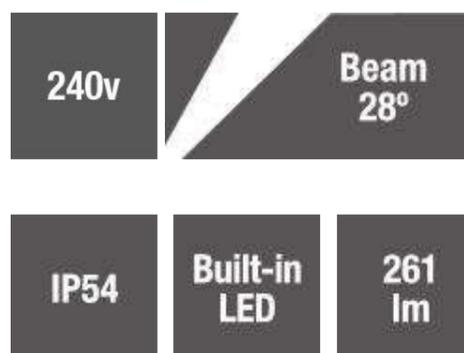

Must be installed by a qualified electrician. Unscrew two grub-screws that secure the base plate. Mark the fixing holes and remove the base plate. Drill the fixing holes and insert the two wall fixings provided. Secure the base to the wall using supplied screws, making sure the two O-rings and washers are fitted. Feed the power cable through the grommet and make the connection to the terminal block in the base of the lamp. The use of T9990 sealant applied around the cable entry is recommended to ensure an effective seal. Place the lamp over the base and secure using the two grub screws. **Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD.**
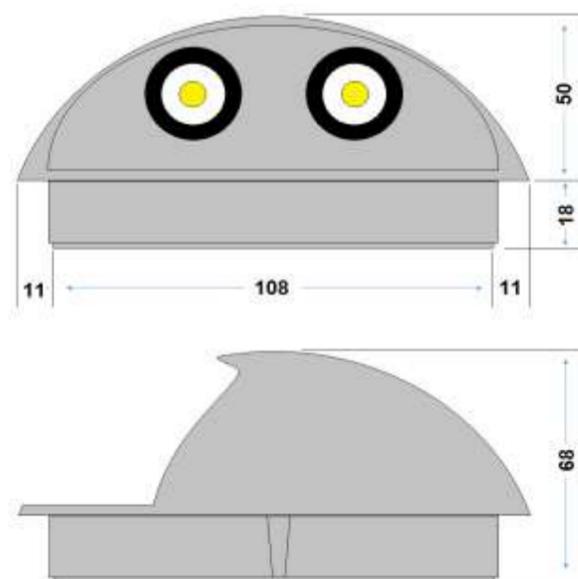

2 YEAR WARRANTY
Powder coated aluminium body & fitting

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials. Corrosion due to exposure to salt or chlorine. Damage due to incorrect installation practices. Responsibilty for 3rd party cost; indirect or consequential loss
