

FEST5 Elipta 5m 240v Festoon Cable with E27 Sockets

Description

Elipta 240v Festoon system uses heavy duty HO5RN-F cable to provide professional quality festoon lighting that can be used in permanent outdoor installations. The Elipta FEST5 5 metre festoon cable has 10 x E27 sockets at 50cm spacing with in-line male and female connectors allowing the cables to be plugged together, end to end. Up to 30 x 5 metre lengths can be plugged together to make up to 150 metres in one line. We recommend the 1 watt 80 lumen E27 golf ball lamp because it is not too bright for most garden installations. But the festoon cable is fitted with E27 lampholders allowing any E27 lamp to be used. We recommend lamps should not be more than 4 watts if connecting long cable runs of more than 100 metres to prevent excessive voltage drop. With short runs the lamps can be of any wattage.

Electrical	240v HO5RN-F 3 core rubber cable with E27 lampholders
Colour/ Finish	Black cable with black connectors and lampholders.
Exterior Dimensions	5 metres with 10 x E27 lampholders at 50cm spacing. 25cm tails.
Cable	HO5RN-F 3 x 1mm

240v E27	IP44	Plug &Play
Pre-wired 5m		

Installation guidelines

Plug together. Screw-on connectors prevent cables accidentally pulling apart. No tools required. Use weatherproof cable ties through fixing hole above each lampholder to secure festoon.

2 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials. Corrosion due to exposure to salt or chlorine. Damage due to incorrect installation practices. Responsibility for 3rd party cost; indirect or consequential loss
