

#### T9963 Cable splice kit

T9963 cable splice kit for connecting low voltage lights to transformers & extending low voltage cable runs

#### TECHNICAL SPECIFICATION

- 2 x PVC insulated butt crimp connectors
- 1 x 120mm x 20mm diameter heat shrinkable sleeve
- Suitable for 1.5mm & 2.5mm two core cable

#### INSTALLATION GUIDE

- T9963 splice kits are designed for connecting low voltage lights from a transformer or along a cable run
- Fit heat shrink over cable first, then crimp yellow butt connectors to join cable ends
- Good practice tip; stagger the length of leads to minimise the thickness of the joint and ensure maximum length of the joint between the cable sleeves is 100mm
- Before heat shrinking, ensure all connections are correct and the lights are working

#### COMPLIANCE & WARRANTY

- 2 Year Warranty
- CE / RoHS Compliant
