

Commissioning

- Ensure that there are no bare or loose strands of wire exposed, and cover all exposed areas of the connection block with two layers of insulation tape.
- Refit the cover, and secure using the side screws (A).
- Replace fuse or circuit breaker and switch on. Your light is now ready for use.

Fitting/replacing bulbs

- When changing a bulb, always switch off at the mains and allow the bulb to cool before handling. Dispose of used bulbs carefully. Do not exceed the wattage stated or use a different shape bulb from that indicated on the fitting.
- Use a soft cloth to handle bulbs, avoid directly touching the bulbs as this will shorten their life.
- Undo the top and bottom screws on the shade and set aside.
- Remove bulb by turning a quarter turn anticlockwise and pulling out.
- Push the bulb gently into the lampholder and twist a quarter turn clockwise to engage pins.
- Refit the shade and screws ensuring that the seals are correctly located.

We recommend cleaning with a soft dry cloth. Do not use solvents or abrasive cleaners as these could damage the finish.

Glass parts – Wash with warm water or just use a damp cloth. Do not use abrasive materials as these will damage the finish.

Recycling advice

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

Safety information

For your safety, always switch off the supply before changing lightbulbs, or cleaning.

This bulb is protected by a glass shade. This part must be replaced immediately should the glass shade become cracked or damaged. This fitting must not be used without the glass shade in place.

This product is rated at IP44.

This product is suitable for dimming.

This product is not suitable for location in or near a marine or sea environment.

The entire unit gets hot whilst on for a period of time.

Specification

Voltage: 240V 50Hz a.c.
Lamp: 1 x 35W GU10 halogen
IP rating: 44

Layout

- Plan the desired layout of this fitting carefully, ensuring the cables will reach the distance between the junction box and the light fitting
- Avoid locating any cables in positions that would cause a hazard. Position cables and junction boxes (not supplied) away from areas where they may be at risk from being cut, trapped or damaged
- Cables in walls must be protected using suitable conduit or plastic trunking.
- The mains supply cable must have a minimum cross sectional area of 1.0mm²
- This product must only be fitted with the lampholder facing upwards.
- This product has special protection against the ingress of moisture and is IP65 rated.

Installation

Existing fittings must be completely removed before installation of a new product. Before removing the existing fitting, **carefully note the position of each set of wires**.

- Remove mounting box (B) from the product by removing screws (A).
- Thread the cable through the hole, ensuring the drain hole is at the base of the mounting box.

- Fix the mounting box to the wall using the screws and plugs supplied (C). Ensure the wall is capable of holding the weight of the product. Take care to avoid damaging any concealed wiring and pipes. The correct fixings should be used for brick or cavity walls.
- Wire as detailed below.

Wiring

Having correctly identified the wiring from your existing light fitting and connect to the connection block inside the product in the following way:

Check that...

- You have correctly identified the wires.
- The connections are tight.
- No loose strands have been left out of the connection block.
